SECTION I: INSTRUCTIONS TO BIDDERS

A. INTRODUCTION

The Smart City Mission (SCM) has been launched by Government of India on 25-06-2015, with an ambition to build 100+ smart cities. The objective of the Smart City mission is to improve the quality of life of citizens by providing core infrastructure, a clean and sustainable environment and application of smart solutions. The SCM is planned to be implemented as a Centrally Sponsored scheme (CSS) spread over a period of 5 years with an annual allocation of Rs. 100 crores each from GoI and GoK for each city and such that each city gets Rs. 1,000 Crores at the end of 5 years period.

The Government of Karnataka has accorded approval for implementation of Smart City Mission Projects as per its Guidelines in the State. In Karnataka a total of 7 cities have been selected in various round of selection process. City of Bengaluru has selected in the 3rd round of selection. The Implementations of these projects are to be taken up by formation of Special Purpose Vehicle (SPV), so as to ensure operational Independence and autonomy in decision making for mission implementation. Of Special Purpose Vehicle (SPV) under the Smart Cities Mission (SCM) is established on the Order of the Government, with an objective to improve the quality of life of the city. From this SPV, various development works are proposed, approved & are in progress.

The Smart City Limited has constructed Multi Level Parking Building to facilitate the parking for the commuters, which is located at Gandhi Bazar Main Road, near Tagore Park, Basavanagudi, Bengaluru.

Objective

BBMP is on lookout for an established ICT based parking management, bidder who will associate with the organization to manage and support the implementation of Smart Parking Solution at MLCP, Gandhi Bazar, Basavanagudi, and Bengaluru. The solution should comprise of Hardware and Software both and it should work seamlessly in the centers even if the internet connectivity is intermittent. The successful bidder will be expected to provide the operation and maintenance services at the developed parking site (MLCP) and complete solution therein for 10 years.

B. CONTENTS OF BIDDING DOCUMENT

1. Scope of Bid as per General Condition of Contractor.

2. Payments

2.1. Payments to the BBMP will be made in accordance with Section VI GCC clause 13 and will be subjected in all respects to the terms and conditions of the Agreement. No party other than the supplier shall derive any rights from the Agreement.

3. Corrupt and Fraudulent Practices

3.1. The Government requires that Bidders/ Suppliers/ Contractors observe the highest standard of ethics during the execution of Government financed contracts. In pursuance of this policy, the Government:

a. Defines for the purposes of this provision, the terms set forth as follows:
    i. "corrupt practice" means the offering, giving, receiving or soliciting of anything of value to influence the action of a public official in the contract execution; and
    ii. "fraudulent practice" means a misrepresentation of facts in order to influence a procurement process or the execution of a contract to the detriment of the Government, and includes collusive practice among Bidders (prior to or after tender submission) designed to establish tender prices at artificial non-competitive levels and to deprive the Government of the benefits of free and open competition;
b. will reject a proposal for award if it determines that the Bidder recommended for award has engaged in corrupt or fraudulent practices in competing for the contract in question;
c. will declare a firm ineligible, either indefinitely or for a stated period of time, to be awarded a Government financed contract if it at any time determines that the firm has engaged in corrupt or fraudulent practices in competing for, or in executing, a Government-financed contract.
d. Bidders should not be associated, or have associated in the past, directly or indirectly, with a firm or any of its affiliates which have been engaged by the Client to provide consulting services for the preparation of the design, specifications, and other documents to be used for the services procurement of services under this Invitation of Tenders.

4. Eligible Bidders

4.1. The lead bidder/member should have minimum 5 years' experience of parking service/management to a Government organization.

4.2. Bidders with Smart Parking Solution experience in Airport/Mall/any Government organization are also considered for this tender.

4.3. A lead Bidder must be Service provider having experience in the operation and maintenance of the Multi-level Parking facility by installing Smart solutions in Private place/airport/any Government organization place.

4.4. The bidder should have an authorisation letter from the technology provider along with the technical specifications as mentioned in the tender with their consent to provide technology to the bidder.

4.5. All technology equipment and software required for this should be from reputed companies and should be from a parking technology manufacturer. Hardware and software should be from same company.

4.6. The company providing the technology should have their technology installed in airports/Government Organisation across the country. (Relevant documents to be provided)

4.7. Lead Bidder either individual Agency must have carried out operation and maintenance of an MLCP with a minimum of **150** Four Wheelers capacity. These criteria may be considered for the multiple projects (MLCP) by adding up the total capacity under operation of all projects. (Relevant documents including installation certificate & satisfactory certificate are to be submitted with authorized from Executive Engineer and above rank)

4.8. BBMP considers a conflict of interest to be a situation in which a party has interests that could improperly influence that party's performance of official duties or responsibilities, contractual obligations, or compliance with applicable laws and regulations, and that such conflict of interest may contribute to or constitute a prohibited practice under Corrupt and Fraudulent Practices. In pursuance of these, bidders, suppliers, and contractors must observe the highest standard of ethics.

BBMP will take appropriate actions if it determines that a conflict of interest has flawed the integrity of any services. Consequently, all Bidders found to have a conflict of interest shall be disqualified. A Bidder may be considered to be in a conflict of interest with one or more parties in this bidding process if, including but not limited to:

- Have controlling shareholders in common; or
- Receive or have received any direct or indirect subsidy from any of them; or
- Have the same legal representative for purposes of this Bid; or
- Have a relationship with each other, directly or through common third parties, that puts them in position to have access to information about or influence on the Bid of another Bidder, or influence the decisions of BBMP regarding this bidding process; or
- A Bidder participates in more than one bid in this bidding process. Participation by a Bidder in more than one Bid will result in the disqualification of all Bids in which it is involved. However, this does not limit the inclusion of the same subcontractor, not otherwise participating as a Bidder, in more than one bid; or
- A Bidder or any of its affiliates participated as a consultant in the preparation of the design or technical specifications of the Equipment and services that are the subject of the bid.

4.2.1 The Bidder should submit a Power of Attorney as per the format at **Annexure-8,** authorizing the signatory of the Bid to commit the Bidder. In the case of a Consortium, the Members should submit a Power of Attorney in favor of the Lead Member as per format at **Annexure-9.**

4.2.2. In case the Bidder is a Consortium, it shall comply with the following requirements:

(a) Number of members in a Consortium shall not exceed 2 (Two);

(b) Members of the Consortium shall nominate one member as the lead member (the "Lead Member"), the Bid should contain the information required for each member of the Consortium;

(c) The nomination(s) of the Lead Member shall be supported by a Power of Attorney, as per the format at **Annexure-9**, signed by the other member of the Consortium;

(d) The Bid should include a brief description of the roles and responsibilities of individual members, particularly with reference to financial and O&M obligations;

(e) An individual Bidder cannot at the same time be member of a Consortium applying for bid Further, a member of a particular Bidder Consortium cannot be member of any other Bidder Consortium applying for the bid;

(f) Members of the Consortium shall enter into a binding Memorandum of Understanding (the "Memorandum of Understanding" or "MOU"), for the purpose of submitting Bid and should submit the same along with the Bid.

MOU should be specific to the Package and should fulfill the requirements set out below, failing which the Bid shall be considered non-responsive. MOU shall, inter alia:

i. Convey the intent of the members of the Consortium to enter into the Agreement in case the bid is awarded to the Consortium;
ii. The Lead Member would enter into the Agreement with BBMP on behalf of the members of the Consortium and subsequently carry out all the responsibilities as the Service Provider in terms of the Agreement;
iii. Clearly outline the proposed roles and responsibilities of each member of the Consortium;
iv. Include a statement to the effect that all members of the Consortium shall under the Agreement, be liable jointly and severally for all obligations of the Service Provider in relation to the bid.

(g) MOU entered into, between the members of the Consortium shall be specific to the project and should contain the above requirements, failing which the Proposal shall be considered non-responsive and liable for rejection.

(h) Any entity which has been barred by the Central/ State Government, or any entity controlled by it, from participating in any project (BOT or otherwise), and the bar subsists as on the date of Bid, would not be eligible to submit a Bid, either individually or as member of a Consortium.

(i) A Bidder including any Consortium Member should in the last 1 (one) year, have neither failed to perform on any contract, as evidenced by imposition of a penalty by an arbitral or judicial authority or a judicial pronouncement or arbitration award against the Bidder, Consortium Member, as the case may be, nor has been expelled from any project or contract by any public entity nor have had any contract terminated by any public entity for breach by such Bidder, Consortium Member.

(j) In computing the Technical and Financial Capacity of the Bidder under Section III, the Technical and Financial Capacity of the Bidder(s)/Members of consortium would be considered. Experience of associate company/parent company/ subsidiary company shall not be considered for qualification purposes.

(k) The following conditions shall be adhered to while submitting the Bid:

I. Bidders should attach clearly marked and referenced continuation sheets in the event that the space provided in the prescribed forms in the Annexures is insufficient. Alternatively, Bidders may format the prescribed forms making due provision for incorporation of the requested information;

II. Information supplied by the Bidder (or other constituent Member if the Bidder is a Consortium) must apply to the Bidder named in the Bid and not, unless specifically requested, to other associated companies or firms.

III. In case of a Consortium one of the member should satisfy the financial turn over criterion as lead member and should have a minimum of **3.6 Crore** in any of the two years over the last 5 years.

IV. Not with-standing anything to the contrary contained herein, in the event that the Bid Due Date falls within three months of the closing of the latest financial year of a Bidder, it shall ignore such financial year for the purposes of its Bid and furnish all its information and certification with reference to the 5 (five) years, preceding its latest financial year. For the avoidance of doubt,

financial year shall, for the purposes of a Bid hereunder, mean the accounting year followed by the Bidder in the course of its normal business.

(l) Change in Consortium

The Authority restricts a change in control of a Consortium; the Bidder is not allowed to change the composition of the Consortium during the Bidding Process and Lock in period for all such consortium shall be minimum 1 year from the date of signing of agreement. In the event of dispute between the consortium members which hampers the work, change in Consortium is allowed with the prior permission of BBMP & in the event of change of consortium the lead member shall continue to be lead member at all time during the period of agreement, otherwise it would, notwithstanding anything to the contrary contained in the Agreement, be deemed to be a breach thereof, and the Agreement shall be liable to be terminated without the Authority being liable in any manner whatsoever to the Service Provider. In such an event, notwithstanding anything to the contrary contained in the Agreement, the Authority shall forfeit and appropriate the Bid Security or Performance Security, as the case may be, as mutually agreed genuine pre-estimated compensation and damages payable to the Authority for, inter alia, time, cost and effort of the Authority, without prejudice to any other right or remedy that may be available to the Authority hereunder or otherwise.

5. Clarification of Bidding Documents

5.1. Prospective Bidders requiring any clarification of the Bidding documents may write queries and upload in the KPPP Portal or communicate to the Office of Executive Engineer RI-1, Division, Ground Floor, Annex-2 Building Bengaluru-560002. The Client will respond to any request for clarification of the tender documents which it receives before pre bid meeting and same shall be uploaded in the KPPP portal.

5.2. BBMP is not responsible for the completeness of the Bidding Document and its addenda if they were not issued directly from BBMP.

5.3. The Bidder is expected to examine all instructions, forms, terms, and specifications in the Bidding Document. Failure to furnish all information or documentation required by the Bidding Document may result in the rejection of the Bid.

5.4.

6. Amendment of Tender documents

6.1. Before the deadline for submission of tenders, the BBMP may modify the bidding documents by issuing addendum.

6.2. Any addendum thus issued shall be part of the tender documents and shall be communicated through KPPP portal and will be binding on them.

6.3. To give prospective Bidders reasonable time in which to take an addendum into account in preparing their tenders, the BBMP shall extend as necessary the deadline for submission of tenders.

C. PREPARATION OF TENDERS

12. Cost of Bidding

7.1 The Bidders shall be accompanied by Bid processing fee for the specified amount mentioned in the KPPP portal. The supplier/manufacturer can pay the Bid processing fee in the KPPP portal using any of the following payment modes.

c. Be payable promptly upon written demand by the Client in case any of the conditions listed are invoked;

d. Be submitted in its original form; copies will not be accepted; and

e. Remain valid for a period of 90 days beyond the original validity period of tenders, or beyond any period of extension subsequently requested

19.3. The Earnest Money Deposit (EMD) of unsuccessful Bidders shall be returned as promptly as possible upon the successful Bidder furnishing the Performance Security.

19.4. The Earnest Money Deposit (EMD) of the successful Bidder shall be returned as promptly as possible once the successful Bidder has signed the Contract and furnished the required Performance Security.

19.5. The Earnest Money Deposit (EMD) may be forfeited:

a. If a Bidder withdraws its Bid during the period of bid validity

b. If the successful Bidder fails to:

i. Sign the Contract

ii. Furnish a Performance Security

20. Format and signing of Tender

20.1. All pages of the Bid shall be signed by the person signing the Bid. Bidder has to scan these original documents and upload at appropriate place on the online portal.

20.2. Any interlineations, erasures, or overwriting shall be valid only if they are signed or initialed by the person signing the Bid.

D. SUBMISSION AND OPENING OF BIDS

21. Sealing and Marking of Bids

21.1. "Technical proposal, EMD submission details along with full EMD requisites" should be submitted online as well as a hard copy of the same without changing the content to be submitted to the office of Executive Engineer RI-1(BBMP) within one working day after bid submission date, "Price Proposal" should be submitted online only.

22. Deadline for Submission of Bids

22.1. Bids must be uploaded no later than the date and time indicated in online notice at the online portal.

22.2. BBMP may, at its discretion, extend the deadline for the submission of Bids by amending the Bidding Document as addendum, in which case all rights and obligations of BBMP and Bidders previously subject to the deadline shall thereafter be subject to the deadline as extended.

23. Late Bids

23.1. Online portal shall not allow the bidder to bid after the specified time and hence bidders should take extra care of the timings of the bid submission.

24. Withdrawal, Substitution, and Modification of Bids

25.1 On the online portal bidders are allowed to withdraw, substitute, or modify its Bid before the final submission time. A Bidder will not be allowed to withdraw, substitute, or modify its Bid after the scheduled submission time.

25. Bid Opening

25.1. The technical proposal will be opened online as well as hard copy as per schedule time and date and Price proposal of only technically qualified bidders shall be opened.

25.2. Price proposals will be opened online only.

E. EVALUATION AND COMPARISON OF BIDS

26. Confidentiality

26.1. Information relating to the examination, evaluation, comparison, and post qualification of Bids, and recommendation of contract award, shall not be disclosed to Bidders or any other persons not officially concerned with such process until information on Contract award is communicated to all Bidders.

26.2. Any attempt by a Bidder to influence BBMP in the examination, evaluation, comparison, and post qualification of the Bids or Contract award decisions may result in the rejection of its Bid.

27. Clarification of Bids

27.1. To assist in the examination, evaluation, comparison and post-qualification of the Bids, BBMP may, at its discretion, ask any Bidder for a clarification of its Bid. Any clarification submitted by a Bidder that is not in response to a request by BBMP shall not be considered. BBMP request for clarification and the response shall be in writing or through e mail. No change in the prices or substance of the Bid shall be sought, offered, or permitted.

28. Responsiveness of Technical Proposal

28.1. BBMP determination of the responsiveness of a Technical Proposal is to be based on the contents of the Technical Proposal itself.

28.2. BBMP will Evaluate the Technical Criteria based on the mentioned conditions and also marks given based on bidder or Contractor uploaded document as mentioned in the RFP document.

28.3. A substantially responsive Technical Proposal is one that conforms to all the terms, conditions, and specifications of the Bidding Document without material deviation, reservation, or omission. A material deviation, reservation, or omission is one that:

a. Affects in any substantial way the scope, quality, or performance of the Related Services specified in the Contract; or

b. Limits in any substantial way, inconsistent with the Bidding Document, BBMP rights or the Bidder's obligations under the Contract; or

c. If rectified would unfairly affect the competitive position of other Bidders presenting

d. Substantially responsive Technical Proposals

29. Nonconformities, Errors, and Omissions

29.1. Provided that a Technical Proposal is substantially responsive, BBMP may request that the Bidder submit the necessary information or documentation, within a reasonable of Price Proposals on the following basis:

- If there is a discrepancy between the unit price and the total price that is obtained by multiplying the unit price and quantity, the unit price shall prevail and the total price shall be corrected.
- If there is a discrepancy between words and figures, the amount in words shall prevail.

30. Preliminary Examination of Bids

30.1. BBMP shall examine the Technical Proposal to confirm that all documents and technical documentation requested have been uploaded on online portal, and to determine the completeness of each document submitted.

30.2. BBMP shall confirm that the following documents and information have been provided in the Technical Proposal. If any of these documents or information is missing in the uploaded documents on the online portal, the offer shall be rejected.

- Technical Proposal Submission Sheet.
- Written confirmation of authorization to commit the bidder.
- Earnest Money Deposit (EMD).

31. Examination of Terms and Conditions; Technical Evaluation

31.1. BBMP shall examine the Bids to confirm that all terms and conditions specified in Bid Document have been accepted by the Bidder without any material deviation or reservation.

31.2. BBMP shall evaluate the technical aspects of the Bid submitted in accordance to confirm that all requirements specified in Schedule of Supply of the Bidding Document have been met without any material deviation or reservation.

31.3. If, after the examination of the terms and conditions and the technical evaluation, BBMP determines that the Technical Proposal is not substantially responsive it shall reject the Bid.

32. Right to Accept Any Bid, and to reject any or All Bids

32.1. BBMP reserves the right to accept or reject any Bid, and to annul the bidding process and reject all Bids at any time prior to Contract award, without thereby incurring any liability to the Bidders.

F. AWARD OF CONTRACT

33. Award Criteria

33.1. BBMP shall award the Contract to the Bidder whose offer has been determined to be the highest evaluated Bid and is substantially responsive to the Bidding Document, provided further that the Bidder has remained qualified to perform the Contract satisfactorily.

34. Right to Vary Quantities at Time of Award

34.1. At the time the Contract is awarded, BBMP reserves the right to increase or decrease the quantity of Equipment and Related Services originally specified in Bid document, provided this does not exceed the 25 percentage, and without any change in the unit prices or other terms and conditions of the Bid and the Bidding Document**.**

35. Notification of Award

35.1. Prior to the expiration of the period of bid validity, BBMP shall notify the successful Bidder, in writing, that its Bid has been accepted.

35.2. Until a formal Contract is prepared and executed, the notification of award shall constitute a binding Contract.

36. Signing of Contract

36.1. Promptly after notification, BBMP shall send to the successful Bidder the Agreement.

36.2. Within fifteen (15) days of receipt, the successful Bidder shall sign the agreement and return it to BBMP.

37. Performance Security

37.1. Within 15 days of receipt of the Letter of Acceptance, the successful Tenderer shall deliver to the Employer a Security deposit (Refundable without Interest) i.e., 5% of Total Revenue generated for 10 years in any of the forms given below for an amount of Rs. 9,00,000/- (Rs Nine Lakhs Only) valid for every 10 (TEN) years and subsequent renewal till the end of contract period plus 6 months.

- Fixed Deposit
- Demand Draft
- Bank Guarantee

37.2. Failure of the successful Bidder to submit the Performance Security or sign the Contract shall constitute sufficient grounds for the annulment of the award and forfeiture of the Earnest Money Deposit (EMD). In that event BBMP may award the Contract to the next lowest evaluated Bidder whose offer is substantially responsive and is determined by BBMP to be qualified to perform the Contract satisfactorily.

SECTION V – SCHEDULE OF WORK

A. Background

BBMP is desirous of obtaining services for "Providing Smart Parking Solution and Operation & Maintenance of Multi-Level Car Parking (MLCP) at Gandhi Bazar, Basavanagudi for a period of 10 years".

The site selected for parking system implementation is located in the Basavanagudi Area of Bengaluru city. Multi-Level Car Parking (MLCP) is located at Gandhi Bazar main road, Details of parking at MLCP are as below.

Number of Floors	Parking Capacity
	Four Wheeler
1	31
2	31
3	31
4	31
Total	**124**

Facilities and Amenities • Separate Entry and Exit • RCC Structure • Firefighting and safety measures • 1 no. of Stair Case to access the parking space. • One no. of Lift • Pump Room and water storage tank • Building Management services/ & security Room/Ticketing Room •/Server Room/commando live room/ Electrical Room/ & UPS Room. /Toilet Facility

B. Scope of Work

1. Develop a user-friendly smart parking system that can be implemented in parking lots to ease parking hassles;
2. Display of availability of parking slot on real-time through web portal/parking App and optimization of parking lot occupancy.
3. Real-time update of entry & exit of vehicle, parking violations.
4. Generate revenues through enhanced efficiency and transparency.
5. Improved user satisfaction by saving time, effort & cost.
6. Availability of real-time data for analysis and business Intelligence for understanding consumer behavior, parking demand and supply.
7. To provide digital experience to the citizens.
8. Dissemination of emergency and critical information to mass in a fraction of second.
9. Leverage the platform to complement the mass notification strategy.

The solution shall include provisions for the following category of parking reservations:

a. **Category A: Walk-in parking** this category includes motorists who enter a parking lot without any prior booking. This category of motorists may be provided a QR Coded ticket, or any other advanced technology as deemed fit by Operator.

ii. Category B: Online reservation for booking of a Parking Slot Interested motorist will be allowed to book a parking slot in any of the parking lot through Mobile Application and Smart Web Portal. The user shall be charged for pre-booking a slot. If the motorist does not show up for one hour (time shall be adjustable as per requirement of BBMP) after the pre-booked time slot, the reservation can be reassigned. This category of motorists may be identified through a Unique Booking Number or a Quick Response (QR) Code or any other advanced appropriate technology as deemed fit by Operator.

iii. Category C: Pass-based Parking (Monthly pass) there will be a provision for users to buy monthly passes for Parking lots for hassle free experience. This category of motorists may be identified through a Unique Booking Number (UBN)/Near-Field Communication (NFC) enabled Smart Card, or any other advanced appropriate technology as deemed fit by the Operator.

a. **Category D: Night parking from 10:00pm to 02:00 Am** The Operator has to run the parking lots at least from 8:00 hours to 24:00 hours. BBMP reserves the right to ask Operator to run any parking facility beyond 24:00 hours as per requirement. Motorists should be allowed to avail night parking services for their vehicles at designated parking lots. The Operator shall display information about the same at mobile app; web portal and LED display angels prominently.

C. Smart Parking Solution

1. Provide and install necessary complete hardware and software solutions, such as but not limited to boom barriers, handheld devices, porta-cabin/workstation, switches, gateway, and guidance system, for parking system.

2. Provide Parking Management System and Parking Guidance System to direct and inform drivers regarding available parking slots through LED Signage and mobile app. Provide and install necessary infrastructure guidance to public regarding availability of parking spaces and other necessary information.

3. Installation of CCTV based surveillance solution for parking lots for monitoring of infrastructure, assets inside the parking and quick response to incidents in all parking lots.

5. Setup and maintenance of Central Control Room/helpdesk including Data Centre (preferably on cloud) with appropriate hardware and software for viewing, analyzing, storing and retrieval of the CCTV feed and monitoring and managing of Smart

6. Mobile App for parking services. App shall show the available slot on real time basis, booking of parking space, payment mechanism through various modes of payment, facility for extension of pre-booked parking space.

7. Comprehensive operation and maintenance of all hardware and software installed for this project throughout O&M period. To manage and collect revenue as per tariff fixed by BBMP for all the parking lots defined in this TENDER

8. Unique identification of each vehicle entering any of the parking lots through bar coded tickets/ magnetic strip cards/ RFID/ Smart Cards/ QR Coded entry etc. as applicable

9. Provide recognition of each parking slot with LED indicators for Indoor parking showing availability of parking slot. Maintenance and up gradation of Parking Guidance & Management Infrastructure at 42 mentioned Parking locations. Using the data generated through the parking solution software for analytics purposes, such as time based (hourly/ daily/weekly/monthly/ annually) trends, area specific trends vehicle, specific trends, usage and vacancy periods, parking demand etc. for the purpose of better management of parking.

a. **SKETCH SHOWING THE MLCP LOCATION. (PLEASE REPLACE with Gandhi Bazar MLCP MAP)**

- Service Provider shall ensure all the safety norms as per Government directions like Fire safety, Safety of Workers & general public, Vehicles, etc. are adhered to with proper Insurance Policies at the building at the premises throughout the Contract Period.
- Service provider should disburse salaries/payments/DA/VDA/ESI/PF to its employees as per relevant labor laws & other applicable law /rules. Deposit the requisite benefits to concerned departments like, ESI, PF, etc. in time. All details to be submitted to BBMP every month.
- Safety of the building, vehicles, people including its employees during the period of contract is the sole responsibility of Service Provider. Any damage/injury shall be repaired/compensated at Service Provider's own cost.
- The integrated data available from all software applications from parking solution proposed should be available in a central database on a central server located at BBMP data center. The data should be stored in such a way that whenever required it can be queried and made available in report format.
- Procurement, installation, configuration, Operating System, Database Licenses, hardening of server infrastructure (e.g. CPU, operating system, RAM, storage, etc.) that will host the software application should be provisioned by the service provider. BBMP will provide only necessary rack space at BBMP Datacenter. Necessary network infrastructure within BBMP Datacenter will also be provided by BBMP. The hardware infrastructure should be able to sustain required load and should support all functional as well as non-

functional requirements.

- Service Provider should ensure submission of security audit certificate and security audit reports for the developed portal, Mobile App and other software. The audit has to be carried out by any of the Agencies like ST&QC, ETDC, CERT-In, Min of Electronics & Information Technology (GOI) or any other Agency which BBMP decides.
- Service provider has to install a kiosk (cabin) at the entry and exit of the MLCP to facilitate the ticket issuer to operate.
- Mezzanine floor shall be allocated to the parking operator office purpose only, and to build at own cost of parking vendor.
- BBMP permits the service provider to install EV charging station facility to be built at own cost by Parking vendor.
- Bidder will be responsible for maintenance of the systems/devices/equipment/work carried out as part of this TENDER throughout the contract period.
- The Bidder will be responsible for all civil and installation work related to network connectivity, power supply extensions to devices, installation of devices and equipment, and any other networking, communication, and infrastructure requirements related to any work under this TENDER document.
- Service provider shall provide adequate battery bank/UPS to ensure uninterrupted power supply to all hardware (equipment, devices, etc.) covered under this TENDER document.
- Informative Display Panels should be installed at all entry points (every floor in case of multilevel car park) of the parking lot indicating available spaces for each parking level, total parking and should be able to be customized by software. The display panel should be easy to understand and must have graphical directional and zone status indication (as red crosses for zone full or green directional arrows to guide drivers to zones with available spaces).
- The Parking Management System should retain videos of car entering/exiting the parking zone for a period of three Months at any point of time.
- User shall have the multiple payment options as given below.
    - Primary mode of payment for parking will be by cash at the Pay Station
    - FASTag, Payment Card (ATM / Debit / Credit Card)
    - UPI mode of payment such as Paytm, GPay, PhonePe, Whatsapp pay or any other UPI payment method.
    - RFID tags (Future state requirement, solution should have RFID natively integrated and shall only require additional hardware to make it fully functional)
- Service Provider should remit the bid amount & other payments like Penalties, Cost of repairs to Damages, etc., to BBMP in the form of DEMAND DRAFT drawn in favor of Chief Commissioner, BBMP, Bengaluru, payable at Bengaluru.
- Service provider may provide car parking space on a monthly basis to businesses in the automobile sector.
- If the Service Provider fails to perform as per the terms & conditions or fails to pay the above amount/Charges even after THREE REMAINDERS it may be noted that tender will be terminated and the damages/arrears will be recovered at risk and cost of the Service Provider from the Performance Security deposit amount.
- Service Provider shall carry out joint inspection with BBMP before the end of Contract period and take remedial measures for defects discovered if any, and to correct them and handover the site in correct manner back to BBMP.
- Liquefied Petroleum Gas: The use of LPG or any other combustible material is not permitted in the building.
- Service provider is permitted to install hydraulic parking equipment on the terrace area.
- Should ensure that all doors/fixtures are maintained in functional condition, particular attention must be paid to self-closing fire smoke check doors and automatic fire/doors/rolling shutters/gates.
- Should ensure that all Firefighting, Plumbing, electrical and mechanical service equipment's are operated & maintained in good working condition at all times with qualified technicians. Annual Maintenance Contract with reputed Agencies (Govt. certified) can be entered at their own cost of Service Provider for maintenance of such specialized services with due approval of BBMP.
- The installed Parking management equipment and related software are to be periodically checked and verified by BBMP IT office or any other agency suggested by BBMP.
- Service provider shall carry out all routine & periodical maintenance activities as per the National Building Code, Indian Standard Codes, Maintenance Manuals, Latest updated Orders/ circulars, etc. of Fire Fighting, Plumbing, electrical and mechanical service equipment's. In case of any damage or repair to any of above equipment/ pipes,

it has to be repaired by the Service Provider at his own cost & restore the facilities within 3 days.

- Should maintain all the equipment like Wet Riser, Down Comer, Hose Reel drill, Automatic Sprinkler System, Yard Hydrant, U.G. Tank with Draw off Connection, Terrace Tanks, Fire Pump, First Aid Fire Fighting Appliances, Auto Detection System, Manual operated Electrical Fire Alarm System, Public Address System with talk back facility, Emergency Lights, Auto D.G. Set, Illuminated Exit Signs, Means of Escape, MCB /ELCB, Fire Man Switch in Lift, Hose Boxes with Delivery Hoses and Branch, STP Equipment, Lifts, & all other equipment, etc.
- Service Provider can obtain any other civic facility like Water, Internet, etc. from the concerned departments with prior approval of BBMP by paying the requisite fee. The usage charges have to be borne by Service Provider.
- Service provider has to provide minimum five-year warranty on the all equipment provided for the services as prescribed in this tender & maintain the same till the end of Contract period.
- Service provider is permitted to install hydraulic parking equipment on the terrace area
- BBMP shall make necessary arrangement to notify and enforce No Parking within 4 sq. km. area around the MLCP in consultation with local traffic police authorities. BBMP shall coordinate with the traffic police authorities for the same. BBMP shall install No Parking signage across the said No Parking zone around the MLCP.
- The EMD and Performance security amount will return to service provider after end of contract period.
- Ensure that two-wheelers/three-wheelers/four-wheelers have seamless access (Entry/Exit) & are parked systematically in neat rows. It is advisable to mark parking lines on the ground in the parking areas in the building including basements with proper numbering with sensors. A parking attendant must ensure that vehicles are parked in an orderly manner and that the vehicles do not encroach upon the open space surrounding the building/fire drive way.
- Marking & numbering have to be clearly visible on each slot of vehicle in the MLCP Parking Bays for accountability.
- Smoking Restrictions: Smoking shall be prohibited throughout the building. Easily readable "NO SMOKING" signage must be conspicuously posted at locations where they can catch the eye. Each sign must also include a pictograph with illumination.
- Service provider is permitted to display all types of advertisements within or outside or on compound wall of the MLCP.
- Storage of flammable substances, such as diesel oil, gasoline, motor oils, etc. is not allowed anywhere within the MLCP building.
- Use of candles, Lanterns or other naked light flame must be forbidden throughout the building.
- A signage shall be posted and maintained on every floor at or near the lift indicating that in case of fire, occupants shall use the stairs unless instructed otherwise. The signage shall also contain a plan for each floor showing the location of the stairways/fire escape route.
- A satisfactory supply of water exclusively for the purpose of firefighting shall always be made available in the underground static storage tank. To prevent stagnation of water in the static water tank the suction tank of the domestic water supply shall be fed only through an over flow arrangement to maintain the level therein at the minimum specified capacity
- Service provider is permitted to enter into an agreement or form a joint venture with the Electric Vehicle manufacturers/EV charging developer or any such providers to establish EV charging stations at the MLCP for the benefit of the motorists using electric vehicles visiting the MLCP.
- Service provider is deemed to have obtained NOC from BBMP to request BESCOM for the required electricity connection at a discounted price to establish and operate EV charging stations at the MLCP. Service provider shall be responsible for the charges/fees to be paid to BESCOM for the said purpose. Such facilities shall be made available to the service provider by the client.
- Control room: Service provider shall establish a control room, with communication system (suitable public address system), to all floors and facilities for receiving the message from different floors. Details of all floor plans along with the details of firefighting equipment and installation shall be maintained in the control room at all times. CCTV monitoring system displaying visuals of all floors shall be installed in control room for security purposes.
- Fire drills and fire orders: The guidelines for fire drill and evacuation etc. as per National Building Code (NBC) have to be adhered to. The periodical inspections & NOC has to be obtained from Karnataka Fire & Emergency authority from time to time at his own cost.
- Provision of Automatic Number Plate Recognition/License Plate Recognition (LPR): License Plate Recognition system consisting of a "frame-grabbing instrument" capable of capturing an image, searching for a number plate's position within the image, and subsequent singling out of the relevant symbols with the aid of optical character reading (OCR) tools, which translate the image pixels shall be provided. Also, the LPR

should be Web-based software product for vehicle license plate recognition from various video sources, such as IP cameras, video files, video capture devices and custom video sources (plugins). The fast and stable LPR engine provides accurate plate detection from real-time video with resolution up to 1920x1080 (Full HD) and it should be supporting Indian plate formats. The data to be retained, not to disclose the privacy and to be shared only with BBMP every month without any extra cost.

- Payment mode for parking charges: Cash payment method, online mode of payment, FASTag, App based mode of payment options should be provided to parking consumers for making payment to parking fee.
- Vehicle parking info Web: The Web portal should be developed and adopted. Web support should give the data that exists on web of all car parking information and it shall be able to extract like Data import, Data export, Data Privacy, Data storing, etc. This data should be retained, not to disclose the privacy, to be shared only with BBMP every Month.
- Crime Prevention Techniques: Service provider shall ensure that no criminal activities happen inside the MLCP premises. Service provider is fully responsible and shall take all measures to prevent any such activity from happening. Service provider shall be responsible for and provide security at the parking site, and shall at the earliest possibility report any such crimes in parking site to Police and BBMP without fail.
- Pre-Booking/Seasonal parking: Depending upon the need, facility for pre-booking in the seasons like daily basis/weekly basis/monthly basis (Pass)/holidays shall be adopted with latest online facilities and manual/app-based facility.
- Service Provider should satisfy himself with the Equipment/Machineries/Assets present in the building as per AS-BUILT drawings & take over the custody.
- The Operator shall integrate the parking mobile app and portal on the BBMP Command & Control Centre and migrate the whole content/database of app. The Operator shall also integrate the parking mobile app and the web portal with the BBMP App as and when such app is launched by the BBMP by itself or through any other Operator.
- Mark all the boundaries of each parking slot in all the parking lots under this tender document with thermoplastic paint of 2.5 mm thickness and 100mm width as per PWD specifications and renew/remark the same after every 2 years or earlier as per site requirement at his own cost.
- The operator shall be responsible for any theft/damage/loss of vehicles parked in parking lots and shall be responsible for settlement of the dispute, if any, including under the Court of Law, and also follow all instructions and guidelines issued by Police/statutory rules & regulations/ BBMP for prevention of misuse of parking lots, including usage by anti-social elements, terrorist(s) etc.
- Undertake all measures for Cyber security, protection of information and communication technology systems of this project from cyber-attacks that are purposeful attempts by unauthorized persons to access ICT systems in order to achieve the target of theft, disturbance, damage, or other illegal actions.
- The Operator shall detect, analyze and mitigate vulnerabilities and protect control room including Data Centre from cyber-attacks throughout the Contract period.
- Service provider shall propose additional measures to increase occupancy of parking lots. Service provider shall take measures to provide value-added services to the customers at the MLCP at additional charges.
- The operator is not allowed to sublet the parking site under this tender. However, the operator can arrange manpower from any source.
- The operator shall inform the BBMP in writing, list of all the assets (details of equipment, software's, services etc.) deployed in the parking facility under this TENDER document, including their costs. The operator shall update such assets list on yearly basis throughout the Contract period.
- Functional, technical requirements & specifications of equipment to be installed by service provider at MLCP shall be provided to BBMP.
- The services of key personnel shall be available full time during the entire contract period from commencement of work and up to settlement of final claims of the contracting agency. Curriculum Vitae (CV) recently signed by the proposed key professional staff and also by an authorized official of the Consultancy Firm shall be scanned and uploaded along with the Technical Bid.

2. SPECIFIC RESPONSIBILITIES OF THE TENDERER

1. Documents

The BBMP shall provide to the Service Provider, the copies of all data & reports available which are considered relevant to the execution of Service Provider's work and liaison with other departments for access of information and data.

2. Liaison and Access

The BBMP shall provide liaison with other Government agencies and Departments for only the introduction of the Service Provider. BBMP will only coordinate with Service Provider for arranging unhindered access to the relevant agencies / Departments in order to complete the task successfully.

3. Schedule for completion of tasks.

The Contract services shall be for 10 years which may be extendable up to a period of another 60 months or so as required by BBMP based on performance and mutual consent.

4. Payments to BBMP

Payments to the BBMP will be made in accordance with Section VI, GCC clause 13 and will be subjected in all respects to the terms and conditions of the Agreement. No party other than the supplier shall derive any rights from the Agreement.

a. Non-performance of Services – levying of penalty & termination

For nonperformance of services a penalty will be levied on the service provider at minimum 0.1% per day on annual bid amount. Further, the contract will be terminated and the damages, arrears will be recovered at risk and cost of the Service Provider from the deposit amount.

Total failure on the performance of services will render forfeiture of the Performance Security Deposit and action will be initiated as per Conditions of Contract.

4. OBLIGATIONS OF THE CLIENT

5.1 Documents

The BBMP shall provide the Service Provider with copies of all data and reports available which are considered relevant to the execution of Service Provider's work and liaison with other departments for access of information and data

5.2 Liaison and Access

The BBMP shall provide liaison with other Government agencies and Departments for the introduction of the Service Provider. The Service Provider shall be given unhindered access to the relevant agencies / Departments in order to complete the project successfully.

5.3 DISPUTES, IF ANY: Dispute if any, between the client and the Service Provider, the decision of the Chief Commissioner, BBMP, Bengaluru is final and binding on both the Client and Service Provider.

SECTION VI – GENERAL CONDITIONS OF CONTRACT

1. Definitions

a.4 The following words and expressions shall have the meanings hereby assigned to them:

a) "Contract" means the Agreement entered into between BBMP and the Successful bidder, together with the Contract Documents referred to therein, including all attachments, appendices, and all documents incorporated by reference therein.

b) "Contract Documents" means the documents listed in the Agreement, including any amendments thereto.

c) "Contract Price" means the price payable to the Successful bidder as specified in the Agreement, subject to such additions and adjustments thereto or deductions there from, as may be made pursuant to the Contract.

d) "Day" means calendar day.

e) "Completion" means the fulfillment of the Services by the Successful bidder in accordance with the terms and conditions set forth in the Contract.

f) "GCC" mean the General Conditions of Contract.

g) "Services" means the services incidental to the operation and maintenance and other similar obligations of the Successful bidder under the Contract.

h) "SCC" means the Special Conditions of Contract.

i) "Successful Bidder" means the Individual or a consortium company or a combination of the above, whose bid to perform the Contract has been accepted by BBMP and is named as such in the Agreement, and includes the legal successors or permitted assigns of the Successful bidder.

2. Contract Documents

Subject to the order of precedence set forth in the Agreement, all documents forming the Contract (and all parts thereof) are intended to be correlative, complementary, and mutually explanatory.

3. Corrupt and Fraudulent Practices

The Government requires that Bidder/ Suppliers/ Contractors observe the highest standard of ethics during the execution of Government financed contracts. In pursuance of this policy, the Government:

a) Defines for the purposes of this provision, the terms set forth as follows:
   i "corrupt practice" means the offering, giving, receiving or soliciting of anything of value to influence the action of a public official in the procurement process or in contract execution; and
   ii "fraudulent practice" means a misrepresentation of facts in order to influence a the execution of a contract to the detriment of the Government, and includes collusive practice among Bidders (prior to or after tender submission) designed to establish tender prices at artificial non-competitive levels and to deprive the Government of the benefits of free and open competition;

b) Will reject a proposal for award if it determines that the Bidder recommended for award has engaged in corrupt or fraudulent practices in competing for the contract in question;

c) Will declare a firm ineligible, either indefinitely or for a stated period of time, to be awarded a Government financed contract if it at any time determines that the firm has engaged in corrupt or fraudulent practices in competing for, or in executing, a Government-financed contract. 2.1Minimum eligibility criteria for participation in the bids are:-

Bidders should not be associated, or have associated in the past, directly or indirectly, with a firm or any of its affiliates which have been engaged by the Client to provide consulting services for the

preparation of the design, specifications, and other documents to be used for the services under this Invitation of bids

4. Interpretation

4.1 If the context so requires it, singular means plural and vice versa.

4.2 Entire Agreement

The Contract constitutes the entire agreement between **BBMP** and the Successful bidder and Supersedes all communications, negotiations and agreements (whether written or oral) of parties with respect thereto made prior to the date of Contract.

a.4 Amendment

No amendment or other variation of the Contract shall be valid unless it is in writing, is dated, expressly refers to the Contract, and is signed by a duly authorized representative of each party there to.

4.4. Severability

If any provision or condition of the Contract is prohibited or rendered invalid or unenforceable, such prohibition, invalidity or unenforceability shall not affect the validity or enforceability of any other provisions and conditions of the Contract.

5 Language

The Contract as well as all correspondence and documents relating to the Contract exchanged by the Successful bidder and BBMP, shall be written in English language. Supporting documents and printed literature that are part of the Contract may be in another language provided they are accompanied by an accurate translation of the relevant passages in English language, in which case, for purposes of interpretation of the Contract, this translation shall govern.

The Successful bidder shall bear all costs of translation to the governing language and all risks of the accuracy of such translation.

6 Joint Venture, Consortium or Association

Joint venture, consortium, are allowed as per the clause ITB 4

7 Notices

Any Notice given by one party to the other pursuant to the Contract shall be in writing. The term "in writing" means communicated in written form with proof of receipt.
A Notice shall be effective when delivered or on the Notice's effective date, whichever is later.

8 Jurisdiction

For all legal matters Jurisdiction shall be Bengaluru only.

9 Scope of work

The Services mentioned in the bid document.

Unless otherwise stipulated in the Contract, the Scope of Supply shall include all such items not specifically mentioned in the Contract but that can be reasonably inferred from the Contract as being

required for attaining Delivery and Completion of the Equipment and Related Services as if such items were expressly mentioned in the Contract.

10 Delivery

The Installation of Smart Solutions and Completion of the Related Services shall be in accordance with the Delivery and Completion at BBMP

11 Successful bidder Responsibilities

The Successful bidder shall Operation and Maintenance Services included in the Scope of work in accordance with O &M Schedule of work.

12 Contract Price

Prices charged by the Successful bidder for the Services performed under the Contract shall not vary from the prices quoted by the Successful bidder in its bid.

13 Terms of Payment

The minimum Annual Amount (including GST & all other taxes) payable to BBMP is fixed at Rs.15,00,000/- (Rs. Fifteen lakhs only) for 1st year, Rs.15,00,000/- (Rs. Fifteen lakhs only) for 2nd year, 15,75,000.00/- (Rs. Fifteen Lakhs Seventy Five thousand only) for the 3rd year, **16,53,750.00**/- (Rs. Sixteen lakhs Fifty Three thousand Seven hundred fifty only) for 4th Rs. **17,36,438.00**/- (Rs. Seventeen lakhs Thirty Six thousand Four hundred Thirty Eight only) for 5th year, Rs. **18,23,260.00**/- (Rs. Eighteen lakhs Twenty Three thousand Two hundred Sixty only). for 6th year, Rs. **19,14,423.00**/- (Rs. Nineteen lakhs Fourteen thousand Four hundred Twenty Three only). for 7th year, Rs. **20,10,143.00**/- (Rs.Twenty lakhs Ten thousand One hundred Forty Three only) for 8th year, Rs. **21,10,650.00**/- (Rs.Twenty lakhs Ten thousand Six hundred Fifty only) for 9th year and Rs. **22,16,182.00**/- (Rs. Twenty Two lakhs Sixteen thousand One hundred Eighty Two only). for 10th year. Hence, the competing tenderer should quote more than the minimum amount fixed. The quoted price shall be inclusive of GST, service tax/other taxes.

Note: Service Provider has to pay annual amount payable to BBMP in the form of DEMAND DRAFT (as stated above) the agreed bid amount in 3 equal installments of the particular year. Delay in payment will attract an interest of 6% per annum. If the service provider fails to pay the money even after three remainders (Notices), the contract will be cancelled at his risk and cost of Service Provider. All the deposits will be forfeited.

14 Taxes and Duties

For equipment/Machineries installed, the Successful bidder shall be entirely responsible for all taxes (inclusive of GST), duties, Registration charges, license, Annual Insurance fees, Road tax and etc., incurred during the operation and maintenance period.

The bidders need to quote the cost as per the present prevailing taxes. However, if there is any change in the tax rate during the period between signing of agreement and completion of project, either increase or decrease, BBMP shall pay or deduct the difference amount.

15 Performance Security

Within 15 days of receipt of the Letter of Acceptance, the successful tenderer shall deliver to the employer a security deposit (Refundable without Interest) in any of the forms given below for an amount of Rs.9,00,000/- (Rupees Nine Lakhs Only) valid for 10 (Ten) years and subsequent renewal till the end of contract period plus 6 months.

- Fixed Deposit
- Demand Draft
- Bank Guarantee

The proceeds of the performance security shall be payable to the Client as compensation for any loss resulting from the Successful bidder s failure to complete its obligations under the Contract.

The Performance Security shall be denominated in Indian Rupees and shall be in one of the following forms:

a) A Bank guarantee or irrevocable Letter of Credit, issued by a Nationalized/Scheduled bank in the form provided in the tender documents or another form acceptable to the Client or
b) A cashier's cheque or Banker's certified cheque, or crossed demand draft or pay order drawn in favor of the Client.; or

The Performance Security will be discharged by the Client and returned to the Successful bidder not later than 60 days following the date of completion of the Successful bidder's performance obligations, including any Warranty obligations, under the Contract.

In the event of any contract amendment, the Successful bidder shall, within 20 days of receipt of such amendment, furnish the amendment to the Performance Security, rendering the same valid for the duration of the Contract as amended for 60 days after the completion of performance obligations including Warranty obligations.

16 Copyright

The copyright in all drawings, documents, and other materials containing data and information furnished to BBMP by the successful bidder herein shall remain vested in the successful bidder, or, if they are furnished to BBMP directly or through the successful bidder by any third party, including successful bidders of materials, the copyright in such materials shall remain vested in such third party.

17 Confidential Information

BBMP and the successful bidder shall not misuse documents, data, and other information received from each other for any purposes related to the Contract.

18 Subcontracting

The Successful bidder is not allowed to subcontract.

19 Specifications and Standards

Technical Specifications

The successful bidder shall ensure that the equipment and related services comply with the technical specifications and other provisions of the contract. The equipment and related services supplied under this contract shall conform to the standards mentioned in the schedule of work and, when no applicable standard is mentioned, the standard shall be equivalent or superior to the official standards whose application is appropriate.

20 Insurance

The Successful bidder has to do insurance of all the equipment, Also the insurance to the MLCP shall be made by Successful Bidder during the Operation and Maintenance period.

21 Inspections and Tests

The Successful bidder shall carry out all tests and/or inspections of the equipment by Govt. Authorized Quality inspection agencies.

22 Liquidated Damages

a. For Operation & Maintenance: In case of a service provider event of default or nonperformance of its obligations, the service provider shall pay to BBMP liquidated damages, as set out in **Section IX.**

23 Warranty

The successful bidder warrants that all the necessary equipment are new, unused, and of the most recent or current models, and that they incorporate all recent improvements in design and materials, unless provided otherwise in the contract.

The successful bidder further warrants that the equipment shall be free from defects arising from any act or omission of the supplier or arising from design, materials, and workmanship, under normal conditions.

The warranty shall remain valid for 12 (twelve) months after the equipment or any portion thereof as the case may be, have been delivered and accepted at the final destination, or for eighteen (18) months after the date of shipment whichever period concludes earlier.

BBMP shall give Notice to the successful bidder stating the nature of any such defects together with all available evidence thereof, promptly following the discovery thereof arising under this warranty.

Upon receipt of such notice, the Successful bidder shall, within the period specified in the SCC, and with all reasonable speed, repair or replace the defective Equipment or parts thereof, free of cost at the ultimate destination. The Successful bidder shall take over the replaced parts/ Equipment at the time of their replacement. No claim whatsoever shall lie on the Client for the replaced parts/ Equipment thereafter. In the event of any correction of defects or replacement of defective material during the Warranty period, the Warranty for the corrected or replaced material shall be extended to a further period of 12 months.

If the Successful bidder, having been notified, fails to remedy the defect(s) within the period specified in the SCC, BBMP may proceed to take such remedial action as may be necessary, at the Successful bidder risk and expense and without prejudice to any other rights which the BBMP may have against Successful bidder under the Contract.

24 Limitation of Liability

Except in cases of gross negligence or willful misconduct:

Neither party shall be liable to the other party for any indirect or consequential loss or damage, loss of use, loss of production, or loss of profits or interest costs, provided that this exclusion shall not apply to any obligation of the Successful bidder to pay liquidated damages to BBMP; and

a) The aggregate liability of the Successful bidder to BBMP, whether under the Contract, in tort, or otherwise, shall not exceed the amount specified in the SCC, provided that this limitation shall not

apply to the cost of repairing or replacing defective equipment, or to any obligation of the Successful bidder to indemnify BBMP with respect to patent infringement.

25 Force Majeure

The Successful bidder shall not be liable for forfeiture of its Performance Security, liquidated damages, or termination for default if and to the extent that it's delay in performance or other failure to perform its obligations under the Contract is the result of an event of Force Majeure.

For purposes of this Clause, "Force Majeure" means an event or situation beyond the control of the Successful bidder that is not foreseeable, is unavoidable, and its origin is not due to negligence or lack of care on the part of the Successful bidder. Such events may include, but not be limited to, acts of BBMP in its sovereign capacity, wars or revolutions, fires, floods, epidemics, quarantine restrictions, and freight embargoes.

If a Force Majeure situation arises, the Successful bidder shall promptly notify BBMP in writing of such condition and the cause thereof.

26 Extension of Time

If at any time during performance of the Contract, the Successful bidder should encounter conditions impeding timely completion of Installation of Smart Solutions Services, the Successful bidder shall promptly notify BBMP in writing of the delay, its likely duration, and its cause. As soon as practicable after receipt of the Successful bidder notice, BBMP shall evaluate the situation and may extend the successful bidder time for performance, in which case the extension shall be ratified by the parties by amendment.

Except in case of Force Majeure, a delay by the Successful bidder in the performance of its Delivery and Completion obligations shall render the Successful bidder liable to the imposition of liquidated damages, unless an extension of time is agreed upon.

27 Termination

Termination for Default

a) BBMP, without prejudice to any other remedy for breach of Contract, by Notice of default sent to the Successful bidder, may terminate the Contract in whole or in part:
   i. If the Successful bidder fails to deliver any or all of the services within the period specified in the Contract, or within any extension thereof granted by BBMP.
   ii. If the Successful bidder fails to perform any other obligation under the Contract.

b) In the event BBMP terminates the Contract in whole or in part, BBMP may procure, upon such terms and in such manner as it deems appropriate, Services similar to those undelivered or not performed, and the Successful bidder shall be liable to BBMP for any additional costs for such similar Equipment or Related Services.

c) If the Successful bidder, in the judgment of BBMP has engaged in corrupt or fraudulent practices, in competing for or in executing the Contract.

Termination for Insolvency

BBMP may at any time terminate the Contract by giving Notice to the Successful bidder if the bidder becomes bankrupt or otherwise insolvent. In such event, termination will be without compensation to the Successful bidder, provided that such termination will not prejudice or affect any right of action or remedy that has accrued or will accrue thereafter to BBMP.

28 Assignment

Neither BBMP nor the Successful bidder shall assign, in whole or in part, their obligations under this Contract, except with prior written consent of the other party.

SECTION VII – SPECIAL CONDITIONS OF CONTRACT

The following Special Conditions of Contract (SCC) shall supplement the General Conditions of Contract (GCC). Whenever there is a conflict, the provisions herein shall prevail over those in the GCC.

Sl.No.	Special Conditions of Contract
1	Upon installation of the Equipment the Successful bidder shall notify BBMP and send the following documents to BBMP: 3 copies of the Successful bidder's invoice showing the description of the equipment quantity, unit price, and total amount; (a) Manufacturer's or Supplier's warranty certificate; (b) Inspection certificate issued by the Govt or BBMP nominated inspection agency, and (c) Certificate of origin. Appendix H:

Functional Requirements of Smart Parking Solutions

Parking Management System	
Parking Location	
□	Parking Management System must geo-reference all the parking lots and shall have the ability to add mo locations in future**.**
□	All parking lots must have one-to-one mapping of all the sensors and POS/Payment systems in that locatio
□	Each parking lot can have a local server for storage and hosting the local parking management application or it can connect via Wi-Fi or other Communication network to central server for exchange of data/information.
Parking Information/Guidance	
□	Parking Management System should enable stakeholders/users to obtain real time information about the availability of the parking lot by location based on the occupancy of parking lot. Also, shall have facility to user to be able to view availability by proximity and cost.
□	The total number of slots and free slots for parking must be displayed on a digital signboard near the parking lots. The Parking Management System's integration with other elements within the tender scope must facilitated is play of parking information at variable messaging displays deployed at key points of interest in the Bengaluru city.
□	Entry to the parking site should have outdoor displays/screens showing overall availability of parking slots on real time basis in that particular parking space
□	Every parking space shall be fitted with occupancy sensors for vehicle detection. Sensor should be intelligent and accurately detect if the vehicles space is vacant or occupied. • Appropriate sensors should be chosen based on the type of the parking spot and its external conditions. • The sensor should be able to detect a vehicle irrespective of the depth or height of sensor installation. Each sensor should have its own unique identification in order to be accurately tracked by the Parking Guidance System. • Each sensor should have an accurate and real time feedback mechanism to be detected automatically by the system in case of faults.
□	Each of the Parking shall be fitted with an aisle light indicator for informing users on their availability on-site: • Light indicators should be installed for all parking lots for motorist to see the available and occupied spaces from the parking lane easily. • Once a parking spot is occupied the total parking slots should automatically get updated. • The fixation of the light indicators to the ceiling should be easy and fast, and should use a quick fastening clips to easy the installation.
□	Informative Display Panels should be installed at all entry points of the parking lot indicating available spaces for each parking aisle, bay/zone/level, total parking and should be able to be customized by software. The display panel should be easy to understand and must have graphical directional and zone status indication (as red crosses for zone full or green directional arrows to guide drivers to zones with available spaces).
□	Entry to any parking space should have outdoor displays/screens showing overall availability of parking slots in that particular parking space.
□	All the Parking Information/guidance system hardware like Sensors, display will be integrated with Parking Guidance Controller which monitors the status of occupancy and controls guidance signs appropriately.
Parking Access Control/Management	

□	Each parking shall have parking ticket dispenser machine at the entrance where the ticket can be issued by the machine on pressing the button by the user/operator.
□	Each entry lane should be equipped with one Entry Device with the following capabilities: • Ticket Dispenser • Medium for motorist to enter Unique Booking Number • EMV compliant CPC reader
□	The ticket, QR Code and CPC or any other technology used by Developer should be capable of capturing data that is easily retrievable at the exit.
□	Every vehicle entering the parking space should be stopped by barrier. The barrier is raised when the motorist Is issued a ticket or has been identified as a legitimate user.
□	In case the parking lot is already occupied to its capacity, the ticket issuing should automatically be blocked and therefore, the barrier should not open.
□	A message should also be displayed on the outdoor screen stating the same.
□	The Entry Device should be able to detect and report: • Anti-pass back • Back-out ticket • Low ticket stock
□	The display on Entry Device should have capability to display messages in English, Hindi and other Regional languages.
□	Any vehicle, before leaving the parking area, should be stopped by a barrier system at the point of exit from the parking.
□	The solution should also include provision to capture the image of the vehicle including license plate view exiting any of the parking spaces and all the information related to the same should be stored at a central server.
□	Exit of every parking should be equipped with a manned Pay station (booth). • For motorists who enter the parking lot using CPC, the same shall be recorded in the system and while exiting, the payment shall be deducted from that card. If the user fails to show up same CPC which was used while entering, the system should not allow the exit and the user must pay the amount as per business rules as specified by Client. • If any discounting is allowed for parking, the business rules for the same shall be handled with prior approval from LSCL/LMC. • The personnel monitoring the exit Pay Station is also required to manually enter the License number details in the system so that the license number, along with date and time of exit, is stored in the database.
□	Once the vehicle exits a parking slot, the total parking slots available in that parking space should automatically get updated.
□	Only after completing the full cycle correctly the transaction will be considered as valid within the car park. However, audit trail of each Complete, incomplete and cancelled transaction should be available in the system.
□	The solution should be equipped with Anti-pass back technology and be Able to detect and report any instance pass back.

□	The barrier should remain in closed position for optimal period of time for the vehicle to Pass at entrance and exit.
□	Barrier Arms should have the following options: In closed position the full arm should be illuminated. During movement the full arm should be illuminated yellow. Once reached open position the full arm should be illuminated Green.
□	Upon horizontal impact by a vehicle, the barrier arm should get detached from the barrier unit with minimal damage to the vehicle and the barrier. Motor mechanism. An alarm should also be raised and sent to the server
□	Upon impact during closure, the arm will stop and stay in the same position. Under no circumstances should the arm re-open upon impact. This is top revent keeping the arm open for illegal entries or exits. • The barrier arm should be easy to refit with barrier unit in a short duration (within one minute). • If for any reason and external override (fire system) needs to be connected, then this should only be possible over the Entry/exit Device and the switch should be permanently monitored by the Parking Management System.
□	The solution should have capability to capture image of the license plates of the vehicles at every entry and exit of each parking lot. The image should be clicked at the entry point when the ticket is issued and at the exit point during payment. The image of the license plate should be linked to the details of the corresponding ticket issued in real- time and stored in the data base for one month. This information will be stored in the server.
□	Parking Management System shall track vehicles entering and exiting parking lots. The Parking Management System should do so at each floor and communicate the data.
□	The Parking Management System should retain videos of car entering /exiting the parking zone.
Parking Pricing and Payment	
□	The Parking Management System should facilitate real time revision of parking fees and should enable real time communication of rules to hand held terminal and parking booths/kiosks from Central facility/Control Centre.
□	Payment sub system shall have the capability of processing and reporting separately numerous transactions including, but not limited to the following: • Normal transaction • Lost ticket transaction • Insufficient funds transaction • Mutilated or unreadable ticket transaction • Non-revenue (no charge) transaction • Blank or used ticket transaction • Validation transaction
□	Parking Management System should enable LSCL/LMC or any other appointed third party to facilitate generation of parking receipts and tickets based on occupancy of parking lots and business rules to be amended from time to time.

□	User shall have the multiple payment options as given below. • Primary mode of payment for parking will be by cash at the Pay Station • Common Payment Card (CPC), FASTag, Credit Card, Debit Card • For bookings through mobile App or Smart Web portal application, payment will be made using e-Wallet, net banking, credit card, debit card etc. • Additionally, the developer can implement innovative and cost-effective payment methods (such as e- vouchers) for customers opting for monthly reserved • Parking passes.
Audit, Performance MIS Reports and Alerts	
□	PMS should track each and every revenue source and should ensure no leakages due to manual intervention.
□	All vehicular passages during the time that the barrier is not functional / down should be recorded and displayed in the reports separately in order to audit the necessary revenue transactions during that time.
□	System shall daily check whether the vehicles that have entered the premises and are yet to leave. Thereby it should be able to generate alert if any vehicle is over staying in the parking lot over24hrs.
□	In case of any sensor or barrier non-functional, an alert should be sent to the console and server to ensure that the administrator is informed that the device is not working.
□	Parking Management System should: • Report occupancy of parking lots to a central software application deployed at the control room. • Include central reporting system establishing the connection between the devices and sensors, and the centralized control room. • Include reporting dashboards with location specific thresholds to be set for generating customized reports be capable of monitoring the number of vehicles that entered or exited the parking premises during any given time. • Generate reports for each parking spot, in each of the parking lots capturing utilization, cost, and revenue details, and details of assets, people and etc. These reports should be available in all standard acceptable formats like .csv, .pdf, .txt, etc.
Stand by or Breakdown/Off-Line/Manual mode	
□	PMS should include the use of wireless handheld device for parking. This device shall be used as a fallback mechanism. However, this device must track every transaction limiting any manual transaction to zero.
□	In case of high traffic at any of the parking lots or during peak hours, it should be possible for the wireless handheld device to be used as central cashiering device (i.e. it should be possible to scan the QR Code on tickets issued by the entry device and issue receipts post payment, so that the motorists could pay for the parking and then drive out quickly), without any time consumed for payment transactions at the exit. • The device should have capability to print parking receipts and bar coded tickets in real time. • Both the functionality of ticket dispensing & cash register should be possible to be combined in one device. • This wireless handheld device should be an online unit, however, in case of network failure, the device should have capability to transact offline and sync with the server as and when connection is restored.

Maintenance Mode	
□	The central system and all the equipment (barrier gates, ticket dispenser, POS units etc.) shall support maintenance mode during repair, replacement and testing of equipment.
□	All transactions done during the maintenance mode on a ticket dispenser or a handheld ticketing machine shall be possible only using a special maintenance smart card issued specifically for the purpose.
□	All such maintenance media shall be deposited with the Client and written requests shall be raised by the developer if they have to be issued to them.
□	All transactions carried out in the maintenance mode shall be reported separately similar to exception transactions.
□	The maintenance mode shall be possible only by using a dedicated maintenance "user privilege login" specially created for this purpose.
Central System	
□	Uploaded data shall not be deleted from system readers or work stations until the central system has provided confirmation that the transactions have been successfully received.
□	The central system shall be able to update its date and time applying time synchronization to servers and using this to in turn update the date and time on all system devices and work stations.
□	All active equipment shall have an internally maintained date and time clock synchronize data time interval via the communications controller with the Central System date and time clock.
□	The time synchronization application in the device shall have the capability to adjust the minimum time interval for updating itself with the central system time and date, and shall be capable to update time as often as every minute (configurable) with the central system.
□	The central system shall manage all device activity and maintain their logs including at a minimum: • Data storage and processing systems • Financial systems • Customer databases • Sales and transaction systems
□	All equipment shall operate with a real-time data connection to the central system via the communications network for that equipment.
□	If the data connection to the central system is temporarily lost, all Equipment shall seamlessly switch to an offline mode in which all data is temporarily stored in internal memory and transmitted to the central system
□	All equipment shall have sufficient memory to operate in offline mode, with no loss of data, for no less than 168 hours.
□	The central software shall support managing parking fare tables.
□	It shall be possible to "future-date" pending fare tables so that they can be uploaded ahead-of-time and automatically activated at the planned date and time.
□	All ticket dispensers and hand held ticketing machines shall store the current valid fare-set as well as a future "pending" fare-set with activation date and time in order to allow downloads to the device to occur in advance.
□	When the activation date and time passes, the ticket dispenser and the hand held ticketing device shall automatically replace the existing fare table with the "pending" fare table.

□	Updated fare-sets shall be downloaded as soon as the central system publishes notice that they have become available.
□	The central software shall be capable of providing over-the-air fare table updates & firmware updates to the hand held ticketing devices apart from other immediate critical updates.
□	The systems should be driven by configurable parameters and should provide the flexibility for maximum configuration. The configurations shall be for, but not limited to: • Time based Fare table etc. • User Groups and users privileges • Time validity of ticket • Time validity of CPC • Penalties associated with the CPC misuse • Pass back time on CPC use • Addition & deletion of equipment, nodes, parking lots, handhelds, user groups, users etc. • Reports access
□	The system shall handle all exceptions. Exceptions can be, but not limited to: • CPC not being read • QR coded ticket not being read • Low balance on CPC • Manual opening of the barrier gate • Paper ticket lost • QR coded paper ticket not readable after entry • CPC lost after entry • CPC damaged after entry • Any other exception as reported.
□	Any exception in the normal process shall be flagged separately for auditing and reports should reflect this condition. Mechanisms should be provided to help audit such exceptions.
□	The system shall handle all degraded conditions which can be, but are not limited of the following: • Ticket Dispenser is not functional • Power failures • Data Connection lost • Particular node down • Central Server down • Any other conditions as reported
□	Alterative mechanisms and all required systems shall be provided for the system in case system is in degraded state as specified but not limited to the above by the developer.
□	There should be provision in the system to enter degraded transactions, in case they are not registered because of degraded operations.
□	There shall be back-up hand held machines capable of performing all the functions of the Parking Station if ever the system is down for some reason.
□	The back-up handhelds shall be a miniature of the capabilities of the Ticket Dispenser and POS units in all respects such as transaction times ,issuing of various fare media etc.

□	There shall be provision for data transfer from the back-up hand-held machines to the central system once the system is "UP" and running, preferably using wired transfer authenticated by a registered user. In no case there should be any duplicity and missing transactions/data in the central database.
□	The developer should provide an automated Fault Monitoring Module to generate reports identifying the faults of the equipment if any on a daily basis. The fault monitoring system shall have as a minimum the following capabilities: • Setting up of automatic and manual alerts • Automatic fault detection & reporting • Fault Status reports • Fault Closure reports
□	The reports shall be non-editable and the Client and/or its representatives shall have real time access to the Fault Monitoring Module with user privileges of the highest level.
□	Automatic Backup/Archiving Software shall provide automatic back-up of the entire database. The software shall allow taking complete back up or incremental back as per the desired archival policy.
Monitoring & Control Dashboard	
□	The parking control center operator shall be provided with a dashboard and monitoring system that is completely independent from the revenue transaction system and shall be displayed and monitored at the parking facility and in the central control room. This system shall record the following information: • The total number of vehicles crossing the gate loop in each controlled entrance and exit lane (count to be obtained regardless of status of equipment components e.g., gate arm raised). • The total numbers of valid card access vehicles for each controlled entrance and exit lane. • The total numbers of valid daily vehicles for each controlled entrance and exit lane. • The number of violation vehicles for each controlled access lane. A violation vehicle is defined as a forced or un-authorized passage of vehicle over the detection area.
□	On this dashboard there shall be a schematic layout showing all the connected parking nodes on the GUI.
□	The various nodes when connected & disconnected shall be represented indifferent color scheme on the GUI of the control center operator.
□	If any particular node is disconnected from the control room, the same shall raise an alarm appropriate action shall be taken to rectify the same.
□	The monitoring dashboard shall allow the operator to click on any node &view the details of the "operator" logged in, time duration since logged in, summary of transaction performed, disable/enable Entry/Exit Station or POS terminal, other components of parking system.
□	The monitoring dashboard shall show the status (connected/ disconnected, faulty/working) of all logical devices (barrier gate, ticket dispenser, camera, CPC reader, receipt printer, QR code reader and other equipment) connected to a particular node when clicking on a node from the monitoring dashboard GUI.
□	In case of any fault in the devices connected to a node, or connectivity failure with a node, a pop-up message shall appear on the monitoring dashboard work station. The operator has to acknowledge the pop-up message & report the type of fault to the maintenance team & shall record the details to the assigned team/individual into the system.

□	Fault assignment to the maintenance team shall be managed and controlled by the system software only. Once a fault is assigned by the control room operator or authorized user to the maintenance team, the same shall be displayed in the maintenance module and once fault is closed/ resolved by the maintenance team it shall be updated automatically (in case of active devices) or else updated manually in the software application / maintenance module promptly.
System Data Requirements	
□	Client shall own all system data and be able to use the central system to export transactions data for processing / analysis using other software.
□	Data shall be retained in the database for at least the financial year previous to the current financial year.
□	Data received from system devices shall be maintained at the original level of transactions and not be aggregated, consolidated, or combined within the database.
□	Sufficient data storage capacity shall be provided in the central system to store online a minimum of one year of activity with full transactional data.
□	All data shall be automatically backed-up daily without human intervention, using the backup devices and media.
□	Means shall be provided to automatically archive data older than one year along with the archiving media to store the data.
□	The functional capability shall be provided to use such archived data to process comparative type reports, such as but not limited to reports utilizing and comparing data from non-consecutive month periods in two different years, or day-of-week comparisons over multiple month or annual periods.
□	The transactional database shall store the date/ time stamped details of each transaction including all information transmitted to the central system from the system devices.
□	Client shall own all system data and be able to use the central system to export transactions data for processing / analysis using other software.
□	Data shall be retained in the database for at least the financial year previous to the current financial year.
Citizen/ Operator/ Authority Interface	
□	The Parking Management System should have a mobile and a web delivery channel for citizens to get real time parking availability and pre-book parking lots using online payment of parking charges facilitated through a payment gate way.
□	A mobile application and web based user interface should be provided with the following features: • The application should have User module and Operator module. • Through the user module, the user should be able to locate nearest parking lot and also pre-book based on his geographical coordinates. The same information must be made available on map with routing information. • The users should be able to see all the parking lots with exact available space in a real time mode. • While locating nearest parking lot, the latest parking slot availability should be given to the user. • The application should have an Authority/Operator module where the designated personnel will be able to check compliance of slot occupancy against the fees paid by the users.

Integration with other Systems

□	Integration with Smart City Command Centre and Mobile Applications -Integration of various components provides seamless access of across the departments which help in operation. So the developer shall provide complete support for any third party integration required to integrate parking with Smart City Platform of LSC Land mobile applications to get real time data.
□	Integration with Common Payment Card - A Common Payment Card (CPC) is being envisaged as part of Smart City Initiatives which shall be used for making payments at multiple merchandises across Bengaluru. The CPC shall be issued by Banks and will be accepted at most of the facilities in Bengaluru including utility payments, transit, parking etc. The developer shall work in close coordination with the CPC and other related agencies to make it workable.
□	The system shall integrate with 3rd Party / Private parking Systems deployed across the City and provide the information to Citizens.
Variable Message Display Board	
□	The VMS board will be deployed at nearby circles to the parking locations for ease of public to know the availability and direction of the parking locations.
□	The Variable Message Display Board Should Consist of Variable Message Sign Board With Local Controller.
□	A VMD software system shall be provided to the central control Room and /or Command & Control center for message preparation monitoring and control of the variable message signs. IP based Network equipment shall be provided to connect the VMD with the VMD software system.
□	The VMD software application will allow user to publish specific messages for managing traffic and also general informative messages
□	VMD software application will allow an operator to seamlessly toggle between multiple VMS points at each workstation in order to send specific messages to specific locations, as well as sending common message to all VMDs. VMD software application will accommodate different access rights to various control unit functionalities depending on operator status and as agreed with the client. Software should be GUI based, and capable to handle 100 VMS signage, user can select desired location in Map, by selecting the location live status of VMS should be displayed.
□	The minimum size of the VMS will be 3mx2m

Technical Requirements of Smart Parking Solutions:

Parking Controller	
□	All occupancy sensors shall be integrated to the Parking Controller to give real time status of parking lot occupancy.
□	The parking controller shall be rugged and shall have sufficient no. of I/O terminals to take feed from occupancy sensors. If multiple controllers are required to cater to occupancy sensors, the same shall be provided.
□	Based on the feedback from the occupancy sensors and Parking System, the controller shall be able to control the parking guidance signals based on their location to guide users accordingly to nearest vacant slot.
□	The Parking Controller shall have operating temperature range of 0 to +70°C.

Public Information Signs (PIS)

□	The PIS shall be used to display information to users at each parking station for the vacant slots.
□	The PIS display board shall be industrial grade flat panels that can with stand the environmental and working conditions found in Bengaluru. The panels shall allow for 24x7 operations.
□	The display systems shall have built-in test facility, able to carry out self-check at periodic intervals as well as exchange of diagnostic information from the parking management central system including power availability, and its current status.
□	The display units shall support multi-lingual fonts in English & Hindi for easy reading.
□	The signs shall include on-going self-diagnostics and shall send an alarm message to the central system in the event that a diagnostic fault is detected.
□	The signs shall be based on LED technology with wide viewing angle suitable for viewing from varied angles and should have been of Amber color.
□	The PIS shall be able to display a message composed of any combination of alphanumeric character fonts, punctuation symbols and full graphics.
□	When messages are displayed in multiple languages, each language shall be rotated through hint urn.
□	Time for which information is displayed in each language shall be configurable.
□	Only outdoor rated UTPCAT 6 cable shall be used to connect the device to the respective switch port. If for any case, the distance between the switch port and device exceeds 90 m, use outdoor rated multi-mode fiber cable with environmentally rugged media converters.
Parking Guidance Signal	
□	The Parking Guidance Signal shall be used to display information to users at each parking station for the vacant slots.
□	The Parking Guidance Signal display board shall be industrial grade flat panels that can withstand the environmental and working conditions found in Bengaluru. The panels shall allow for 24x7 operations.
□	The Parking Guidance Signal shall be of full matrix type with provisions to show Parking availability (in numeric format) and guided with arrow.
□	The Parking Guidance Signal systems shall have built-in test facility, able to carry out self-check at periodic intervals as well as exchange of diagnostic information from the parking management central system
□	The display units shall support multi-lingual fonts in English, Hindi for easy reading.
□	The signs shall include on-going self-diagnostics and shall send an alarm message to the central system in the event that diagnostic faults detected.
□	The signs shall be based on LED technology with wide viewing angle suitable for viewing from varied angles and should have been of Amber color.
□	The PIS shall be able to display a message composed of any combination of alphanumeric character fonts, punctuation symbols and full graphics.
□	When messages are displayed in multiple languages, each language shall be rotated through in turn.
□	Time for which information is displayed in each language shall be configurable.
□	Only outdoor rated UTPCAT 6 cable shall be used to connect the device to the respective switch port. If for any case, the distance between the switch port and device exceeds 90 m, use outdoor rated multi-mode fiber cable with environmentally rugged media converters.

Antivirus

□	Antivirus shall be able to detect and block malicious software in real time, including viruses, worms, spyware, Trojan horses, adware, and Rootkit etc. It shall provide zero-day detection technology.
□	Antivirus shall protect the system from multiple forms of anomalous network behavior that is designed to disrupt system availability and stability.
□	Antivirus shall be able to identify infections by name, category, severity, hosts and user etc.
□	Antivirus shall be able to report Bot incidents by specific malicious activity (spy ware, IP scanning, spam etc.).The antivirus shall have built in intelligence and co-relation capability to inspect, detect and block active and dormant bots.
□	Antivirus shall be able to block devices based on Windows Class ID. Devices shall include USB, Infrared, Bluetooth, Serial Port, Parallel Port, Fire Wire etc. Anti-virus shall block or give permissions for such devices.
□	Antivirus shall protect transmission of data being sent to hacker system who has spoofed their IP or MAC address.
□	Antivirus shall scan email traffic including email client like Outlook.
□	Antivirus shall include content filtering and data loss prevention.
□	Antivirus shall have features to prevent peer to peer sharing, streaming media, games and other applications from internet.
□	Antivirus shall have built in URL filtering.
□	Antivirus shall provide standard and customized reports.

Firewall

□	Firewall shall have the capability for proactive network attack detection.
□	Firewall shall prevent replay attack.
□	Firewallshallhaveaunifiedaccesscontrolwithfunctionalitiessuchas: • Brute force attack mitigation • Sync cookie protection • Zone based IP spoofing • Malformed packet protection
□	FirewallshallhaveanIntrusionPreventionSystem(IPS)withfollowingfeatures: • Stateful Operation: ➢ IP Defragmentation ➢ Bi-directional Inspection ➢ Access Lists • Alert sand updates: ➢ Alerting SNMP ➢ Log File ➢ Syslog ➢ E-mail

	➢ Daily and emergency updates • Security Maintenance: ➢ 24/7 Security Update Service ➢ Real-time and History reports of Bandwidth usage per policy ➢ Protocol anomaly detection ➢ IPS attack pattern obfuscation ➢ User role based policies ➢ User based application policy enforcement ➢ Provision for external bypass switch
□	Fire walls hall have a file-based antivirus with following feature: • Antispyware • Anti-adware • Anti-key logger • Anti-malware • Antivirus • Anti-spam • Scanning of HTTP, SMTP, IMAP, FTP protocols • Signature database • Integrated enhanced web filtering • Redirect web filtering

Online Web-based Portal and Mobile App:

The Online Web-based Portal and Mobile App are aimed at providing on-the-go access to various services and facilities available in BBMP. Both will serve as windows of information about Parking Infrastructure at BBMP and as a platform to deliver services online while providing an avenue to disseminate information on Parking facilities and present status to citizens.

Mobile App-Functional &Technical Requirements (To be linked with BBMP website/portal):

Functional Requirements	Technical Requirements
i. All applications, content, data, and information related to the App and users should be securely hosted and saved in the Data Centre. ii. Free to download and use for all citizens, guests and visitors. iii. Should be light, intuitive, easy to use, responsive, secure and easy to maintain. iv. Compatible with and responsive to all leading smart phones on Wi-Fi, GSM and CDMA networks. v. Operating System (OS) should be independent and available on all major OS platforms including iOS, Android, Windows, Symbian and Blackberry. vi. Development of the app to be undertaken on Open Platform, if new mobile OS is introduced in future.	i. Shall be developed in an open platform ii. Should be scalable and technically adaptable to future enhancements iii. Should be published and released in all the major platforms including iOS, Android, Blackberry, Symbian and Windows. iv. Should support Unicode and be multilingual in at least English and Hindi v. Should be easy to update as some data will be updated daily. Ability to collect data with high volume, velocity, and variety. vi. Should track GPS location of the user device. vii. Should provide accurate mapping and navigation services. viii. Collect data categorically without impacting citizen's privacy issues ix. Live feed of parking lots and number of free spaces should be provided to app.

vii. As and when required, up gradation of the App, in line with the evolvement of mobile OS. viii. Appropriate tags should be built-in the introduction text and content of the Smart App and Portal so that they are displayed in the top search results. ix. Updation and management of information and content, including information related to Smart Parking initiatives, on the Mobile App throughout the concession period.	x. App should confirm acceptance of payment and reserve/cancel the parking lots accordingly. xi. Shall be SSL (Secured Socket Layer) compliant.

Online Portal – Functional & Technical Requirements (To be linked with BBMP website/portal):

Functional Requirements	Technical Requirements
i. Create and manage up-to-date information and content, including information related to all Smart Parking initiatives, on the Online Web – based Portal throughout the project duration ii. All applications, content, data, and information related to the Online Web-based Portal as well as its users should be securely hosted and saved in the Data Centre. iii. Should be light, intuitive, easy to use, responsive, modular, secure, and easy to maintain. iv. Should support customization of Look and feel to BBMP / BBMP's requirements. v. Developer should ensure submission of security audit certificate and security audit reports for the developed portal and the audit has to be carried out by any of the Agencies like ST&QC, ETDC, CERT-In, Min of Electronics & Information Technology (GOI) or any other Agency which BBMP decides. vi. Should be built on industry leading framework and support seamless integration with the backend systems, to easily retrieve and save data. vii. Portal must be Omni channel i.e. its design should be such that it can be viewed easily on laptops, tablets and mobiles. viii. Should be browser independent and work seamlessly on all leading browsers. ix. Should have workflow capabilities with regard to the content approval and publishing process. x. Provisions to track and generate web traffic reports for Portal administrators	i. Should be based on Open Standards. ii. Should integrate with any other portal products through open standards such as HTML, XML, RSS, web services, and WSRP iii. Should support encryption and compression features iv. Shall be OS independent. It must run on Windows, UNIX, Apple and Linux operating systems. v. Site must be "responsively designed" to accommodate mobile users. This must include accommodations for slower, cellular internet connections. vi. Portal must be secure in all the way and all the latest security implementations like https, xss, sql injection, etc should be implemented to avoid any hacking. vii. The site must be designed for continuous operation, 24 hours a day, 7 days a week with maintenance window clearly defined. viii. Shall be browser independent and responsive to run in the same manner on leading browsers like Google Chrome, Mozilla Firefox, Safari, Internet Explorer, etc. ix. Shall support Unicode and be multilingual in at least English and Hindi. x. Shall have provision for patches, hotfixes and bug fixing solutions. xi. Shall adhere to the best possible security standards in the industry. xii. Shall support broad range of standards as applicable xiii. Shall support minimum Web 2.0 capabilities xiv. Shall be SSL (Secured Socket Layer) compliant and the Developer has to provide appropriate SSL certificate before the portal is made available on public domain. xv. Shall adhere to W3CAG, GIGW, and G.O.I guidelines

Mobile App and Web Portal–Required Features and Functionalities

All the requirements, features, and functionalities listed below, but not limited to, should be available by the Developer on both the app and the web portal.

a) Citizen registration

i. One-time online registration to be done and stored in the data center.

ii. Terms of service to be accepted by the user prior to log-in

b) Parking Guidance System

i. Current GPS location determined.

ii. User enters final destination.

iii. Nearest available parking spaces are shown using maps in decreasing order of distance, the rates of each parking applicable at that time shall also be displayed and if user decides to reserve it, reservation is done with payment done from e-wallet/ payment gateway or any other method defined in the RFP.

iv. Number of vacant parking slots in a particular parking on map should also be shown to user.

v. User should be able to locate alternate route and parking lot after seeing the traffic congestion either by Online Web-based Portal or third party portal.

vi. Limit set on the advance time for online reservation of parking slot (24hrs).

vii. User can take monthly pass for indoor parking only.

viii. Online cancellation for the spot should also be provided in case of online reservation.

c) Integration with Third Party Services and Apps:

i. The Developer has to ensure that the App can integrate and interface with popular and established third party services and applications (private or public) that wish to integrate with Mobile App, upon approval from BBMP.

ii. The App should integrate with and allow payments through the selected third part shared services for Payment Gateway and e-Wallet.

iii. The App should have provisions to integrate with Emergency Response services.

iv. The parking application should be integrated with the BBMP app / Web portal in near future with the approval of BBMP.

d) **Frequently Asked Questions (FAQs)** and Contact Details of different offices of BBMP:

i. The App should have a section detailing frequently Asked Questions (FAQs) related to Smart initiatives and their related responses.

ii. The section should also provide contact information of Helpdesk Customer Service for parking problems, if any.

e) Settings:

i. User should view version and details of the App

ii. User should have the option to toggle between sending current GPS data to server or not.

iii. User should have the option to select a specific button on their cell phone to set as SOS short-cut, when pressed and help continuously for a certain amount of time.

iv. User should be able to toggle whether or not to send anonymous user data that can be helpful in fixing bugs or solving crashes.

v. User should be able to select notification settings.

vi. User should be able to select app notifications to be displayed on the home/locked screen.

vii. User should have ability to enable/disable sound alerts

f) Feedback/Complaint/Suggestion:

i. User should able to give their suggestions/ feedback/ complaint through the portal/app

ii. User should Able to track their complaint status

iii. Generation of reports on various types of complaints.

g) Officers Login

i. User should be able to search the vehicle on real time basis.

h) Booking/Payment of Parking Lot

i. Users should be able to book the ticket through the app.

ii. Pre-booking of the vacant lot should also be made available for the citizens

Real-time Monitoring and Dynamic MIS Reporting:

i. Parking Management System shall include central reporting system establishing the connection between the devices and sensors and the Central Control Center.
ii. Solution shall include reporting dashboards with location specific thresholds to be set for generating customized reports
iii. Shall be capable of monitoring the number of vehicles entering/ exiting the parking premises during any given time
iv. Shall generate real time reports for each parking spot, in each of the parking lots capturing utilization, revenues, status of assets and personnel. These reports should be available in all standard acceptable formats like .csv, .pdf, .txt, .xls etc.
v. Ensure analytics on the following the matric areas:

- Enforcement–Daily report on violations
- Peak parking demand on hourly basis at each parking lot;
- Daily, weekly, monthly, quarterly and yearly average occupancy at each parking lot;
- Average time of occupancy;
- Revenue trends daily, weekly, monthly, quarterly and annual

IT Security:

Developer shall Undertake all measures for Cyber security, protection of information and communication technology systems of this Project from cyber-attacks that are purposeful attempts by unauthorized persons to access ICT systems in order to achieve the target of theft, disturbance, damage, or other illegal actions. The Private Operator shall detect, analysis and do mitigation of vulnerabilities and protect Central Control Centre including Data Centre from cyber-attacks throughout the Contract Period. The developer should have to include the latest gen firewall, IPS/IDS etc as safety measure to ensure the proper security of the data center and all associated software's.

Parking Software Supply, Installation, and Testing & Commissioning of parking management system– Centralized Reporting & Management software with following features:

i. Shift reports including Operator name, Shift number and Shift wise traffic &transaction details
ii. Traffic Report both in summary and detailed formats
iii. Transaction details, time wise, period wise and shift wise
iv. Systems Reports including Gate Statistics, System Runtime, and System Reboot.
v. Daily &Monthly Summaries
vi. Other reports as per requirement of BBMP for efficient management

Centralized Reporting & Management software: Supply, Installation, Testing & Commissioning of Parking revenue control / Billing & payment collection software:

i. Automatic Fee Computation based on either Fixed or Hourly plans. Provision for different tariff plan for different parking lots.
ii. Provision for user name and Passwords to restrict use to authorized persons only.
iii. Separate provisioning for Administrator and for General User
iv. Flexibility of Housekeeping within the software, which shall include Re-indexing,
v. Deleting, Backup & Restoration of Data
vi. There shall be a provision that new entries to the car park are not permitted in case of the full occupancy of the Car Park
vii. Unique Identity for each transaction shall be created
viii. There shall be a provision to auto-capture images of cars at entry. Further there shall be a provision of storing such images with the unique identity, within the system and to recall the same at exit.

ix. Provision for pre-booking of parking space with flexibility of different or same charges for pre-booking, provision for cancellation of pre-booking, some percentage of charges for previous hours before actual booking hours.

Software for implementation of PMS:

i. Shall be implemented in the Integrated Industry Standard Open Platform to manage, monitor and control the Smart parking initiative.
ii. Shall monitor and configure all devices with respect to parking (sensors, displays etc.)
iii. Shall control the system functionality and enable remote monitoring from other computers.
iv. Shall provide capability to create full report of exact location with respect to floors, areas, levels, etc. Shall be customizable and able to update the parking lot occupancy and entry/ exit of vehicles in real time.
v. Shall provide real time status of all system components.
vi. Shall report alarms/ notifications when devices are un-connected; in the case of any equipment failure, on-screen alarm is displayed/ notified at the central control centre.
vii. Should issue notifications if a car is abandoned after the requisite period of time.
viii. Shall provide full graphical plan information of the car park with exact locations.
ix. Shall allow download of the information and configuration of fields for maintenance purpose.
x. Shall have built in tools for third party integration to obtain real time information.
xi. Shall provide access at user levels with passwords.
xii. Shall have historic log for available spaces, period of time.
xiii. The software should be able to handle manual overriding of available spaces, special parking requirements for reserved spaces and handicapped lots.
xiv. Shall manage energy saving of the car parks according to car park occupation.
xv. Shall reduce brightness of light indicators manually or automatically according to occupation.
xvi. Shall monitor any CCTV camera with IP connection.
xvii. Shall monitor electricity consumption, voltage, energy and harmonics.

Central Control Room/ Helpdesk

The central control room/ helpdesk will be the nodal point of availability of all online data and information related to smart sensors based Parking solution and connected to BBMP network of services. It shall consist of the following:

i. Centralized System with video wall f o r live monitoring.
ii. Equipment health monitoring and generates alerts.
iii. Centralized data storage and its management.
iv. Integration with Third Party Shared Services.
v. Online backup of all data in.
vi. Public Complaint Handling (non-working of app, portal, transaction failure etc.)

Central Control Centre shall be established with all hardware, software and network infrastructure including switches, firewall, routers, storage servers, application servers, video-wall and other necessary equipment. The same shall be operated & maintained by the Developer throughout the concession period.

CCTV Based Surveillance solution for all Parking lots:

CCTV based surveillance solution enable BBMP to plan events, monitoring of Infrastructure, encroachments etc. It helps in enforcement of law, monitoring of public areas, analyse patterns, and track incidents enabling quicker response and other following attributes:

- Help for more effective operations
- Quicker response to incidents
- Increased situational awareness
- Increased attractiveness to businesses and workers
- Improved planning and resource allocation

- Improved communications about incidents

CCTV based Surveillance Cameras should cover areas of all parking lots given in RFP document. CCTV feed for 30 days will be kept in a local server in individual parking lots or combination of two or more parking lots. FTTH, MPLS based network with suitable b and width shall be provided at each parking lots to view the online CCTV footage from the central control room. Applicants will be responsible for design and engineering of all the network components for the live CCTV feed and analytics to the central control centre, to meet functional requirement of project with suitable software interface both at back end and frontend and facility for storage of Camera feed up to 30days. Number of cameras to to be installed shall be as per site requirement so that complete area of all parking lots shall be covered by these CCTV cameras and all parking slots shall be separately identifiable through these CCTV cameras. Additionally one lane all-around parking lot beyond parking area shall also be covered so that unauthorized parking near parking lot can be identified.

Two Wheelers parking:

Camera-sensor based identification can also be proposed for two wheeler parking in the mentioned parking locations the camera having features for identification of two wheelers will be installed by the Developer. The online Updation shall be available at the central server, CCC of BBMP and Mobile App.

i. Camera based parking occupancy detection system with capability of outdoor and indoor based two wheeler occupancy detection.
ii. Shall provide reliable detection within 20 seconds of two wheeler parking/ un-parking event occurrence.
iii. Shall support all weather operations – day/ night/ rain/ fog with reliable detection better than 80% (clear weather 90% reliability).
iv. Shall be connected online with central control centre.

Training & Capacity Building:

Training & Capacity Building–Scope of Work

The purpose of this section is to define the scope of work for training and capacity building to be implemented at various levels namely:

a) Employees of BBMP officials.

b) The developer's scope of work also includes preparing the necessary documentation and aids required for successful delivery of such trainings.

c) The details provided in this section are indicative and due to the complex nature of the project the number of training sessions may increase. Over and above the team considered for performing the training as detailed in subsequent sections,

d) Developer will develop a training and capacity building strategy that will also include a detailed plan of implementation.

e) Developer will get the Training and capacity building strategy including training material finalized with City SPV before starting the training programs.

f) Developer will prepare all the requisite audio/visual training aids that are required for successful completion of the training for all stakeholders.

Maintain and Hand over System Documentation

Maintain and Handover System Documentation to the BBMP: Developer shall maintain at least the following minimum documents with respect to the Smart Parking Management System:

i. High level /Low Level design of whole system

ii. System requirements Specifications(SRS)

iii. Any other explanatory notes about system

iv. Trace ability matrix

v. Compilation environment

Developer shall also ensure Updation of documentation of software system ensuring that:

i. Source code is documented and provided to BBMP / BBMP

ii. Functional specifications are documented

iii. Application documentation is updated to reflect on-going maintenance and enhancements including FRS and SRS, in accordance with the defined standards

iv. User manuals and training manuals are updated to reflect on-going changes / enhancements.

Sl No **Tentative Specifications (**Service provider may submit any other improvised specifications for enhancement of services, subjected to acceptance by BBMP**)**

Equipment for MLCP PGMS Components

13 Entry / Exit Boom Barrier Gate

A boom barrier, also known as a boom gate, is a bar, or pole pivoted to allow the boom to block vehicular or pedestrian access through a controlled point. Typically the tip of a boom gate rises in a vertical arc to a near vertical position. Boom gates are often counterweighted, so the pole is easily tipped. Boom gates are often paired either end to end, or offset appropriately to block traffic in both directions. Some boom gates also have a second arm which hangs 300 to 400 mm below the upper arm when lowered, to increase approach visibility, and which hangs on links so it lies flat with the main boom as the barrier is raised. Some barriers also feature a pivot roughly half way, whereas the barrier is raised, the outermost half remains horizontal, with the barrier resembling an upside-down L when raised.

Support external and built in ground sense, aluminum alloy metal corrosion resistant 1.5-2mm thick, brushless DC movement, chassis made of steel plate treated with Orange color high grade automotive paint to prevent corrosion and fading. Change over from power supply to UPS to manual, insulation class F, protection level IP 44.

Barrier Boom Arm Length	Maximum3.5m
Opening/closing time	1.5s
Duty cycle	100%
No. of digital inputs	4
No. of relays/digital outputs	4
Boom Arm	Folding boom with Breakaway flange with sensor to detect
MTBF	10 million cycles
Enclosure rating	IP54
Enclosure Type	The Barrier Cabinet and Boom should have finished with an anti-corrosion paint system. The Barrier gate control system shall be located inside the main Barrier Cabinet and should give easy access to all electrical components for connection, maintenance and programming, including the power isolation switches
Safety Sensor	The Barrier gate should have infrared sensors to detect the presence of human, vehicle and other object for extra safety.
Temperature range	0□Cto+55□C.

14 ANPR Camera

Automatic Number Plate Recognition Camera of 2MP
Dimensions: Body : 121.5mm x 109mm x 231mm, Support : 160mm(L)
Power supply: AC24V (± 10%) PoE + (IEEE 802.3)
Consumption: 15W (PoE +, 17W)

CPU: Embedded soc arm11, 528MHZ, 256MB DDR2, 256Mb Flash memory.
Firmware: Firmware update via HTTP.
Supported Operating Systems: Windows 2000, Windows XP, Windows Vista, Windows 7, Windows 8.
Browser: Windows Internet Explorer 6.0 or higher.
CPU Requirements: Intel pentium 4 1.8GHz or higher.
RAM Requirements: 1GB or higher, standalone graphics card.
Mobile: Supports iPhone, iPad and Android
Supports SD / SDHC card for cyclic recording.
Operating temperature: -40 ℃ to 50 ℃.
Alarm Inputs / Outputs: 1 digital input (TTL, +3 to 5VDC) / 1 output (MOS relay contact to N.O., max. 40VDC / 300mA load)
Sensor: 1 / 2.8 "3.23MP CMOS
Focal length: 2.8-12 mm (Zoom / motorized)
1 / 2.8 "CMOS Image Sensor
Diaphragm: F1.4
Viewing Angle: 91.2 ° to 25.5 ° (H), 68.4 ° to 19.1 ° (V), 114 ° to 31.9 ° (F)
Ø92 heat resistant glass
Progressive Scan
Maximum wavelength: 850nm
IR Cut Filter: Automatic / Program / Day (Color) / Night (Mono)
Minimum illumination: 0.02 Lux to F1.4 (low light mode) / 0 Lux with IR LED On
White Balance: Auto / Tungsten / Interior / Fluorescent1 / Fluorescent2 / Exterior1 / Exterior2
Backlight Compensation: Off / On
Shutter speed: 1/30 (1/25) s to 1 / 8000s
Video Protocol / Video Compression: RTP / HTTP, RTP / TCP, RTP / UDP, Multicast
Protocols: IPv4, IPv6, TCP, UDP, HTTP, SMTP, NTP, DDNS, UPnP, FTP, ARP, DHCP, PPPoE, DNS, RTSP, RTCP, Telnet, ICMP, IGMP, ONVIF Profile S, SNMP, SIP, Bonjour
Channels: CVBS 1.0Vp-p, 75 ohm, BNC Connector
Encryption: Base64 HTTP Encryption
Access: Multi-user access levels with password protection IP filter
Multiple IP Addresses
Up to 8 simultaneous users
Network Interface: 10Mbps / 100Mbps Base-T, RJ-45
RTSP Authentication: On / Off
IP protection: IP66

Video compression: H.264, JPEG
Bit rate: 128Kbps to 8Mbps. Frame rate in controllable bits on the fly. Supports VBR / CBR / GOP

15 Entry Ticket Dispenser / QR Code Unit

Display :	DisplayshallbeLCDcolourgraphicsuserdefinabledisplay240x 160pixelstypewithdamageresistantlenscapableofdisplayinggraphicsandimages.
Ticket Capacity :	Dispenserpaperrollcapacityshallbeatleast5,000 tickets per roll and shall have a built-in photo sensor to give paper roll low level indication.
Printing technology :	The Dispenser shall have built-in high speed ticket printer based on thermal technology and able to print tickets with text and graphics including QR code. Tickets issued shall be cut with a self-sharpening ticket cutter
Printing Speed :	The print speed shall not be less than 150mm/s for both text and graphic and at a minimum resolution of 200 dpi (8dots/mm).
Communication :	Dispenser controller device shall communicate over Ethernet with the Central Server. No proprietary RS485 cabling or other proprietary system is allowed for communication to dispenser
Interface :	Dispenser controller shall support USB, Serial, and RS-232communication mediums to add on devices. Dispenser controller shall have additional inputs and outputs assignable tofunctionslikeopen/closedsignrelaysforbarriergatesandindicationlightsoperation.

Controller :	The Dispenser Control unit shall include CPU, input/output terminals, and power supply and logic board for display.
Environmental :	All dispensers shall come with standard equipment such as heater and cooling fan using a thermostatic controller to ensure a reasonable operating temperature for components in various weather conditions. Humidity range is up to 90% non-condensing.
Enclosure :	The Dispenser shall have Front/ Rear door for easy access for ticket loading and logic board access. The Dispenser housingshallbeatleastIP54.
Operating Temperature :	The Dispenser shall haveoperatingtemperaturerangeof0□Cto +55□C.

16 Entry / Exit Fixed CCTV Cameras

Same as Sl No. 1

17 Parking Controller cum Operator Console & Command centre.

Same as Sl No. 7

18 Thermal Receipt Printer

Same as Sl No. 2

19 QR Code Reader

Same as Sl No. 3

20 Parking Availability LED Display Board

Function	PIS shall be used to display information to users at each multi-level parking station for the vacant slots.
Display lines	Type A:Mounted outside MLP area indicate vacant parking lots on each floor to the users shall have single line with 15 Characters (Alphanumeric) each for the all the respective floors.
	Type B: Mounted at designated locations on each floor to indicate vacant lots for that particular floor shall have single linewith15Characters(Alphanumeric)each
Color	Multi color
Language	The display units shall support multi-lingual fonts in English and Kannada for easy reading.
Character height	60mmatleast
Weight	Shallbelessthan2.0kg
Type of protection	IP66
Temperature	0°Cto+55°C.
Power Supply Requirement	240Vacat20W
LED type	Ultra bright All nGaPLEDs
	8000mcdat20mA,300viewingangle
	Suitable for outdoor condition under bright sunlight
Viewing distance	>50meters
Communication Interface	RS232andEthernet
Reliability	MBTF:100000hours
And maintainability	MTTR:15min.
Self-Diagnostics	The display systems shall have built-in test facility, able to carry out self- check at periodic intervals as well as exchange of diagnostic information from the parking management central system including power availability, and its current status.

21 MLCP / Off-Street Local Server including the OS and Database License (As per Bidder's Solution)and accessories

Make	HP/Dell/Lenovo

Form factor/height	Tower
Processor	Intel® 7th generation Core™ i7-7700 Processor (3.60 GHz Base Frequency/Clock Speed, 4MCache, 4core) or higher
Motherboard	Intel Q150 chipset or better
Memory	16GB RAM, DDR4, Shall be expandable to 32GB
RAID Controller	RAID controller with RAID-0, 1 and 5 support
Network	4 Giga bit Ethernet NIC
Ports	2RS232, 1RS485
Network interface controller(NIC)	LPT-Parallel
Trusted platform module(TPM)	
PCIe3.0Expansion slots(x16/x8)	Total 6 USB ports (min.2 at front) with at least 2 USB3.0
USB ports	HDMI/DVI
WiFi	Intel ®Wireless–N72602AC 802.11ac,2x2,2.4GHz/5GHz+Bluetooth®4.0
Storage	Usable 2TBSAS/SATAorBetterwithRAID-0
Monitor	18.5”or higher wide screen LED Backlit based TFTs, Resolution–1366X 768or better, TCO Displays 5.0 certified or better monitor should be of same make of offered PC Brand.
Input inter face	Keyboard and Mouse(Same make of PC)
Operating System	OperatingSystemshallbeLicensedversionof64bitlatestversionofLinux/Unix/Microsoft®WindowsbasedOperatingsystem

22 Handheld Terminal Ticket Machine(POS)

Same as Sl No. 4

23 GSM / GPRS connectivity from Hand held to BBMP Datacenter

24 Connectivity between Off-street Parking Lot to BBMP Data center

Both Network and cloud method.

25 OnlineUPSwith6 hour backup(As per Bidder's Solution)

26 PGMS Application Software for MLCP

Centralized Dashboard for Manager/Control Room;
Centralized dashboard containing the data from all Gates in one place.;
Display basic metrics like :-
Total vehicles in a day/week/month,
Vehicles currently present inside,
Traffic movement;
Records can be view in tabular format for any day, week or month;
Analytics section includes record analyzed in the form of graph on daily, weekly and monthly basis; Complete details of the Vehicles;
Entry/Exit time;
Type of vehicle owned Vehicle number / tag ID/ name of person etc;
Dashboard contain the provision for debarring the Park+ TAG if people leaves the society or for any unwanted Vehicle;
Can generate notification on Guard App if any commercial vehicle (Ola/ Uber) stayed for overtime inside premise;

27 Web Portal & Parking Mobile App for Consumers

28 PGMS Server including the O Sand Data base License (As per Bidder's Solution)

29 Any other item which service provider feel essential for scope of work.
